大会简介 INTRODUCTION TO THE CONFERENCE

为牢记习近平总书记“做好煤炭这篇大文章”的殷殷嘱托，深入贯彻落实习近平总书记关于“四个革命、一个合作”能源安全新战略，打造全球性高层次煤炭行业交流合作平台，引领全球煤炭工业智能化开采和清洁高效利用，推动我国采煤技术和装备走向世界，促进全球煤炭工业高质量发展，由中国国家创新与发展战略研究会指导，中国国家创新与发展战略研究会能源产业研究院发起的“2026世界煤炭科技创新大会暨2026世界煤炭工业博览会”拟定于2026年3月7日至9日在上海新国际博览中心举行。届时将邀请美国、俄罗斯、印度、印度尼西亚、澳大利亚、哈萨克斯坦、蒙古国等煤炭生产国组团参展、参会，邀请全球煤炭产业链企业集中展示煤炭采掘、勘探、生产、销售、贸易、投资、运输及出口行业头部企业的新技术、新产品、新工艺、新成果、新方案等，强势打造开放包容、互联互通、共同发展的世界煤炭工业命运共同体，深入推进全球煤炭全产业链国际合作，为推动全球煤炭工业可持续发展提供中国方案、贡献中国力量。

To earnestly carry forward General Secretary Xi Jinping's important instructions to "do a good job with coal," and to fully implement his new energy security strategy of "Four Revolutions and One Cooperation," the 2026 World Coal Science and Technology Innovation Conference and 2026 Global Coal Industry Expo will be held from March 7 to 9, 2026, at the Shanghai New International Expo Centre. Guided by the China Institute for Innovation & Development Strategy and initiated by the Energy Industry Research Institute of the China Institute for Innovation & Development Strategy, the event aims to establish a global, high-level platform for exchange and cooperation in the coal sector, lead advancements in intelligent mining and the clean, efficient use of coal, promote Chinese coal mining technologies and equipment to the world, and drive the high-quality development of the global coal industry. Major coal-producing countries, including the United States, Russia, India, Indonesia, Australia, Kazakhstan, and Mongolia, will be invited to organize delegations for participation. Leading enterprises across the global coal industry chain—covering mining, exploration, production, sales, trade, investment, transportation, and export—will showcase their latest technologies, products, processes, achievements, and solutions. The event will work to build an open, inclusive, interconnected, and mutually beneficial global community for the coal industry, strengthen international cooperation across the full coal value chain, and contribute Chinese solutions and Chinese strength to the sustainable development of the global coal sector.

TECHNOLOGY CHANGES COAL
创新成就未来
INNOVATION MAKES THE FUTURE

煤炭,这一在全球能源体系中举足轻重的资源,承载着人类历史的沧桑与变迁,它不仅在中国的能源版图中占据一席之地,更在世界范围内有着广泛而深刻的应用。作为我国主体能源,煤炭一直在能源供应中发挥着“压舱石”和“稳定器”作用。党的十八大以来,煤炭行业在习近平新时代中国特色社会主义思想的指引下,紧跟时代步伐,围绕煤炭生产、消费、技术、体制等四个方面不断开展自我革命,行业数字化转型、智能化发展和煤炭清洁高效利用步伐不断加快,建设了一批智能化示范煤矿,建成了世界上最大的清洁高效煤电供应和现代煤化工技术体系,科技创新引领带动行业高质量发展的作用愈发凸显,煤炭安全兜底保障能力大幅提升,行业探索出一条安全、高效、绿色、智能的高质量发展之路。

Coal, a vital resource in the global energy system, has witnessed the ups and downs of human history. It holds a crucial position not only in China's energy landscape but also in the broader global context. As China's primary energy source, coal has served as the "ballast" and "stabilizer" of the nation's energy supply. Since the 18th National Congress of the Communist Party of China, under the guidance of Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, the coal industry has kept pace with the times, pursuing self-reform in four key areas: production, consumption, technology, and institutional mechanisms. The industry has accelerated its digital transformation, advanced intelligent development, and promoted the clean and efficient use of coal. A number of intelligent demonstration coal mines have been built, along with the world's largest clean and efficient coal-fired power supply system and a modern coal chemical industry system. Scientific and technological innovation has increasingly become a powerful driver of the industry's high-quality development. The coal sector's capacity to ensure safety has significantly improved, and a path toward safe, efficient, green, and intelligent development has been successfully forged.
